Dear Colleagues and Friends,

It is a great pleasure and honour to announce this year's 6th annual CORR “Canadian Outcomes Research Review” course, formally known as the Principles and Practice of Clinical Research Course. This year’s course will be held at the Four Points by Sheraton Hotel, Toronto Airport, in Mississauga, Ontario on September 21 and 22, 2012.

The primary subjects of this year’s CORR course are the principles of clinical research, research study design, practical aspects of clinical trials, health economics, health statistics, educational research, and innovation in research. We strongly believe that this program will provide research and industry personnel, surgeons, residents, fellows and other health professionals with a comprehensive foundation in the present state of health research methodology by covering basic science methods, evidence based-medicine principles, levels of evidence, research ethics, funding opportunities, as well as data management and budgeting.

In addition to the official program, this course offers excellent opportunities to meet experts in the field and establish relationships with other colleagues. The program also includes multiple integrated panel discussions and focuses on resident research. Following every session of material, all faculty involved will participate in high-level dialogue that will require participation and critical thinking. Furthermore, activities will be introduced to participants during panel discussions so that participants are able to apply learned material.

Registration is now open, and we encourage you to register without delay, as space is limited. Our Conference Coordinator is available to assist you with all aspects of the registration process. Please feel free to contact the Conference Coordinator at 289-337-0857 or by email at coordinator@cmecourses.ca for assistance. We have included a Course Brochure and a Registration Form for your review. Please visit our website at www.cmecourses.ca for additional details.

On we offer you a very warm invitation to attend this year’s 6th annual CORR Course.

Sincerely,
Course Directors

Mohit Bhandari, MD, PhD, FRCSC
Chair, Division of Orthopaedic Surgery,
Department of Surgery
McMaster University
Hamilton, Ontario

Emil Schemitsch, MD, FRCSC
Head, Division of Orthopaedic Surgery
St. Michael's Hospital
Professor of Surgery
University of Toronto, Toronto, Ontario
Canadian Outcomes Research Review

September 21 and 22, 2012
Four Points by Sheraton, Toronto Airport

The 6th Annual CORR Course will feature new content including material focusing on successful resident research.

SESSION I  Principles of Evidence-Based Surgery
SESSION II  Principles of Clinical Research: Study Designs
SESSION III Preparing the Study Protocol
SESSION IV  Practical Aspects of Randomized Trials: How to Do it Right
SESSION V  Practical Aspects of Non-Randomized Studies: Maximizing Quality
SESSION VI  Statistics Primer: What Are the Basics You Need to Know
SESSION VII Disseminating Research: Writing Papers and Presenting Your Findings

COURSE FACULTY
Our renowned CORR Faculty Members, from universities across Canada, provide a vast amount of experience in surgical research methodologies.
